

2022 Student Connections Application

Due to info@betterseed.org by March 11, 2022

The American Seed Trade Association (ASTA) and Seed Science Foundation (SSF) proudly announce an exciting program for college students, *Student Connections*. *Student Connections* provides students the ability to network, engage and promote the seed industry at ASTA's annual Leadership Summit.

Student Connections is offered through ASTA and SSF to provide students an opportunity to network with industry professionals who represent diverse seed backgrounds including seed breeders, sales, marketing, agronomy and senior leadership of seed companies from the United States, Mexico, Canada and beyond.

Students in an undergraduate or graduate degree program with an interest in joining the seed industry upon the completion of their studies are encouraged to apply.

Selected students will have the opportunity to:

1. Attend ASTA's Leadership Summit (with financial assistance). This conference will be held in Indianapolis, IN and is one of the most important seed industry meetings in the world, attended by many seed industry professionals from all over the world. You will have the opportunity to participate in discussions and decision-making forums on some of the most important issues effecting U.S. and world seed trade.
2. Each selected student will be matched with a seed company representative who will act as a mentor during the conference and a resource after the conference.
3. Students will have an opportunity to network with seed industry leaders throughout the conference.
4. Students will have the opportunity to present a summary of their research project in a poster session and possibly in an oral presentation.
5. Students will be candidates for the Roger Krueger Scholarship with the winning student being asked to make an oral presentation during the conference.
6. ASTA student membership will be granted to students who are a part of *Student Connections*. Benefits of student membership include access to seed industry news, job and internship notifications, complimentary conference registration, and more.
7. *In the event that the conference moves to a virtual platform for students, all students who submit an application will be granted complimentary student membership and registration to the virtual conference. ASTA and SSF will select finalists for the Roger Krueger Scholarship from the submitted applications.*

Application Deadline: March 11
