

## **When it comes to Cover Crops, the Best Seed Means the Best Results**

---

Did you know that cover crops lead to healthier soil which means increased fertility, sustainability and productivity on your land?

Professional cover crop seed is grown for seed from the start, using improved genetics and the latest agronomic standards. It has been tested for purity and germination to ensure you get the highest quality seed to meet your production expectations, while minimizing the chance for invasive species and other weeds and diseases.

When you buy your seed from a respected, professional seed supplier, you know you're getting clean, consistent seed that's been tested for maximum performance and targeted for your specific needs. Professional seed suppliers work with farmers to achieve success through managing the use of the right seed, at the place, at the right time.

Contact your **local, professional seed supplier** to discuss your individual needs and goals, and make this your best growing season yet! It all starts with the seed. And better seed means better crops and more reliable outcomes.
